PRODUCT SAMPLES
& URGENT PARTS

FOR E-COMMERCE BRANDS

You imagine it. We print it.

Custom samples. Urgent parts. Made locally.

Keep your next product moving while overseas samples are still on the way. Start with a locally printed prototype.

LOCAL PRINTING. FASTER POSSIBILITIES.

3dnearyou.com

FROM WAITING TO MAKING

Your supplier can be overseas. Your next sample can be local.

3DNRU helps e-commerce sellers turn ideas, drawings and existing parts into physical samples. Review the shape, check the fit and refine the details before your next production decision.

01

See the idea sooner

Hold a physical sample, compare versions and share clearer feedback with your supplier.

02

Solve the small details

Adjust a handle, opening, holder or insert before committing to a larger order.

03

Think like your customer

Check how a product fits, feels, displays and unpacks before it reaches a buyer.

EXPLORE THE COLLECTION

03 **Product samples & prototypes**
Housings, fit models, handles and design variations

04 **Accessories & branded displays**
Custom stands, organizers, clips and display risers

05 **Urgent replacement parts**
Knobs, spacers, feet and lightweight fixture brackets

06 **Packaging & fulfillment tools**
Insert samples, box-fit models and alignment fixtures

A local prototype supports development; final factory materials, production samples and performance still need approval. All product visuals in this catalog are illustrative concepts.

01 / PRODUCT DEVELOPMENT

Touch it. Test it. Refine it.

Bring your next online product into the real world with a sample you can review.

ILLUSTRATIVE CONCEPTS / CUSTOM MADE TO ORDER

S01 Product housings

Explore the shape, lid alignment and openings of a plastic product enclosure.

Customize: size, wall layout, openings, lid fit.

S02 Handles & grips

Compare grip shapes and how a product feels in the hand before final tooling.

Customize: profile, diameter, finger contours.

S03 Fit & assembly models

Review how a sleeve, cover or cap meets its matching component.

Customize: clearances, mating edges, connection style.

S04 Design variations

Print alternative shapes side by side to help your team choose a direction.

Customize: proportions, details, version count.

Best for concept review and fit checks. Functional performance and production-equivalent finishes require separate review.

02 / YOUR PRODUCT, YOUR FIT

Made around your product.

Create useful accessories and presentation pieces sized for your brand and your buyers.

ILLUSTRATIVE CONCEPTS / CUSTOM MADE TO ORDER

A01 Stands & holders

Build a desk stand, device cradle or countertop holder around a specific item.

Customize: angle, cable access, base size.

A02 Organizers & trays

Explore organizers for desks, drawers, workstations and product bundles.

Customize: compartments, footprint, depth.

A03 Cable clips & guides

Keep cords positioned with a clip or guide designed around your setup.

Customize: slot size, shape, mounting approach.

A04 Display risers

Present products for photos, demonstrations, pop-ups or sales meetings.

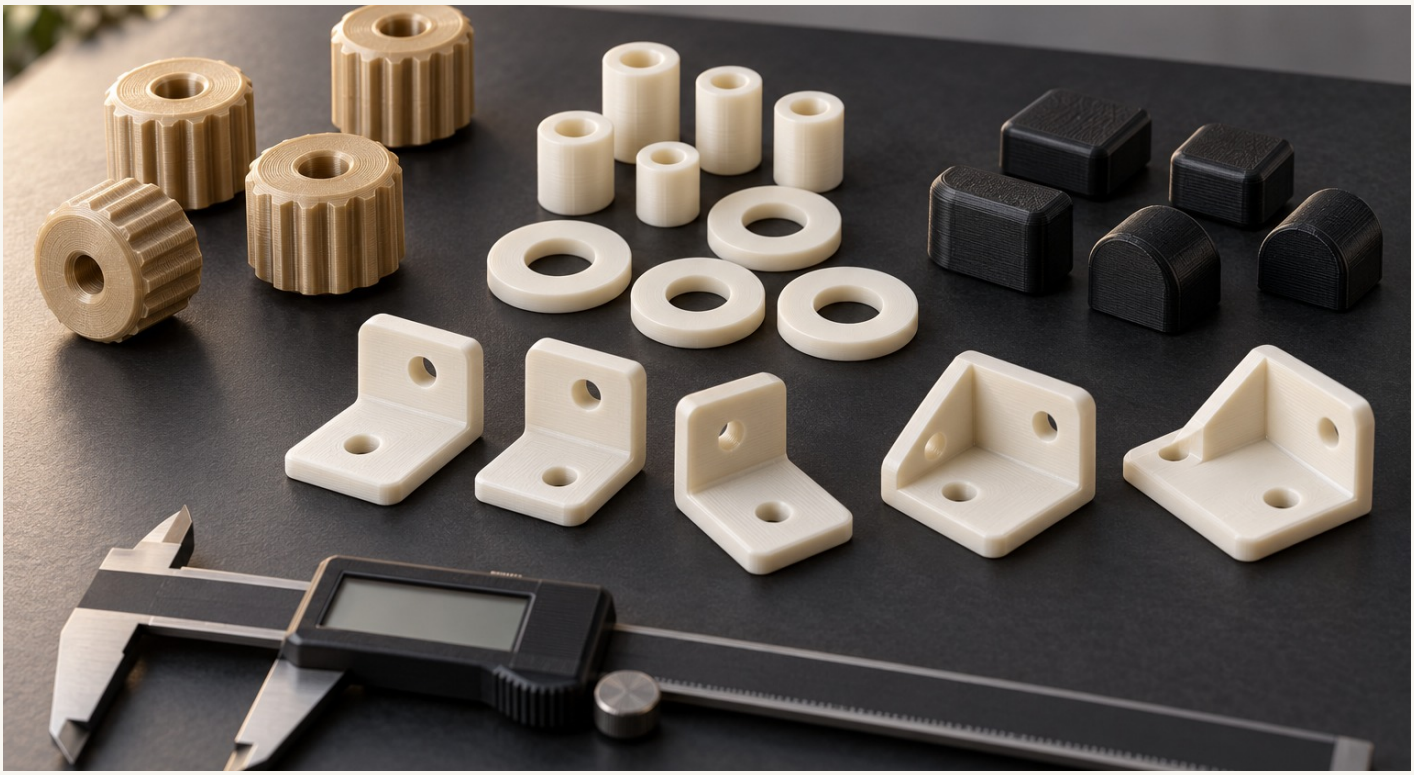

Customize: levels, logo details, display footprint.

Single samples and small batches can be quoted. Use final-product images in customer listings when appearance differs from a prototype.

03 / SOMETHING MISSING?

Need a part ASAP?

Send the part, a measured drawing or clear photos. We review it for a custom local print.

ILLUSTRATIVE CONCEPTS / CUSTOM MADE TO ORDER

R01 Replacement knobs

Replace a missing adjustment knob for a suitable non-critical application.

Customize: bore shape, diameter, grip profile.

R02 Spacers & washers

Create a specific gap or spacing for a fit check, display or light fixture setup.

Customize: hole size, thickness, outer diameter.

R03 Feet & end caps

Explore protective covers and feet for suitable non-critical products.

Customize: shape, socket fit, height.

R04 Fixture brackets

Position lightweight items with a custom bracket for a desk or work fixture.

Customize: hole spacing, angle, mounting points.

Suitability, fit and load must be reviewed. These examples do not imply approval for safety-critical, medical or load-bearing uses.

04 / A BETTER UNBOXING STARTS HERE

Check the fit before you ship.

Prototype the packaging experience and build simple tools around repeatable daily tasks.

ILLUSTRATIVE CONCEPTS / CUSTOM MADE TO ORDER

B01 Packaging insert samples

Check product placement and compartment layout inside a proposed box.

Customize: cavities, spacing, box dimensions.

B02 Box-fit models

Use a product-shaped dummy to review box sizing and bundle arrangements.

Customize: outer shape, dimensions, bundle count.

B03 Label alignment fixtures

Position an item consistently while checking a labeling or packing workflow.

Customize: product cradle, stops, alignment guides.

B04 Sizing gauges

Compare dimensions against a simple custom guide during sample review.

Customize: opening size, reference faces, labels.

Insert prototypes demonstrate fit and layout. Shipping protection, drop testing and production packaging need separate validation.

A CLEAR PATH TO YOUR NEXT SAMPLE

Imagine. Print. Review. Improve.

Make the decisions that matter while the product is still easy to change.

01

Send your idea

Share a 3D file, PDF, sketch, photo or existing part, plus dimensions and intended use.

02

Agree on the plan

Confirm the design scope, material, finish, quantity, quote and target completion time.

03

Print the sample

We produce the approved version locally, with rush scheduling for eligible projects.

04

Review it in your hands

Check fit, feel, size and presentation. Mark up any changes you want for the next version.

05

Move forward

Request a revised sample, quote a small batch or share the approved design with your supplier.

Build customer satisfaction into the sample. Test the details buyers notice: a comfortable grip, the right fit and a thoughtful unboxing.

YOUR SPECIFICATIONS COME FIRST

Made to fit your idea.

Choose the details that support your sample goal. We confirm what is practical before printing.

Shape & dimensions

Overall size, openings, compartments and how the part meets other components.

Brand details

Raised or recessed text, logos and identification marks, subject to printable detail.

Color & appearance

Available filament colors, matte looks and a finish appropriate to the purpose.

Material & quantity

PLA or PETG options reviewed for the use. One sample, several versions or a quoted batch.

KNOW WHAT YOUR SAMPLE WILL SHOW

Appearance	Layer lines and support marks may be visible. Agree on any finish needs in advance.
Fit	Identify critical dimensions. A mating part may need a test print and revision.
Use	Tell us about heat, force, moisture and contact with other products before material selection.

A photo or PDF is a starting point. It may require 3D modeling and confirmed measurements before it can become a printable part.

MAKE THE DEADLINE PART OF THE BRIEF

Need it ASAP? Start here.

ASK ABOUT SAME-DAY PRINTING

Available for eligible jobs after design approval, subject to size, complexity, material availability and the production schedule. Your completion time is confirmed with your quote.

SEND THESE DETAILS FOR A USEFUL QUOTE

01 **The idea or part**

Attach your STL or other available 3D file, PDF, sketch or photos.

02 **The measurements**

Include units, overall dimensions, critical fits and a matching part if relevant.

03 **The intended use**

Explain what the sample must demonstrate and any forces or conditions.

04 **The order details**

Tell us quantity, color preference, delivery ZIP code and your exact deadline.

Every project is quoted to the brief.

Pricing reflects modeling or file preparation, part size, material, print time, finish, quantity and any rush service. Confirm what revisions, taxes and delivery charges are included.

Production time, dispatch and carrier delivery are separate. Pickup or shipping arrangements are confirmed before you order.
