3DNRU 3D NEAR YOU

A COLLECTION FOR CARE ENVIRONMENTS

The Healthcare Collection

Anatomical models. Distinctive displays.
Thoughtfully made for your institution.

HOSPITALS / NURSING HOMES / DENTAL PRACTICES

You imagine it. We print it.

3dnearyou.com

CRAFTED TO BE SEEN. DESIGNED TO BE UNDERSTOOD.

Bring ideas into three dimensions.

From a single anatomical model to a coordinated collection for an entire facility, 3DNRU creates custom printed objects around your audience, setting and purpose.

01 **Hospitals & practices**

Educational models, specialty displays, outreach pieces and institution-branded presentations.

02 **Nursing homes & senior living**

Familiar-object displays, activity collections, room identifiers and reception pieces.

03 **Dentists & dental groups**

Oversized teeth, arch models, demonstration sets and distinctive practice displays.

09 Curated collections
10-11 Customization & ordering

This catalog presents concepts for general education, display and nonclinical use. Images are illustrative, not completed client projects or clinical anatomy references.

01 / ANATOMICAL COLLECTION

Anatomy, made tangible.

Turn complex forms into objects people can see, hold and discuss with a qualified educator.

ILLUSTRATIVE CONCEPT / CUSTOM MADE TO ORDER

M01 Heart models

Create a focal point for cardiovascular education, a specialty practice or a reception display.

M02 Brain models

Build a teaching collection or a sculptural display around the brain and its external form.

M03 Lung models

Pair a lung model with your approved teaching content for general respiratory education.

M04 Kidney models

Commission a kidney display with a custom base, title or department branding.

Also ask about liver, digestive, eye, ear and skin-section models. Geometry, detail and educational content are reviewed before production.

02 / STRUCTURE & MOVEMENT

A closer look at the body.

Choose a body region, a viewing angle and the level of detail your educational setting needs.

ILLUSTRATIVE CONCEPT / CUSTOM MADE TO ORDER

M05 Skull models

Request a desktop or enlarged skull model for teaching, presentations or specialty displays.

M06 Spine segments

Show a selected spinal region with custom scale, labels and a stable presentation base.

M07 Joint models

Explore knee, hip, shoulder and other joint display concepts around an approved design.

M08 Hands, feet & limbs

Build a region-specific collection, from hand and foot anatomy to larger limb displays.

Full-body, torso and other body-region concepts can be requested. Multi-part designs and any moving features are quoted after design review.

03 / DENTAL PRACTICES & GROUPS

Small details. Clearer views.

Give your dental team a distinctive way to explain general concepts and present your practice.

ILLUSTRATIVE CONCEPT / CUSTOM MADE TO ORDER

D01 Enlarged tooth models

Make a single tooth a presentation centerpiece, with scale and surface detail selected for the brief.

D02 Dental arch models

Commission generic upper and lower arch display models for staff-led demonstrations.

D03 Demonstration sets

Coordinate teeth, model stands and label holders for a structured educational collection.

D04 Practice displays

Create branded tooth sculptures, desktop pieces and custom presentation bases.

These are education and display models. Dentures, aligners, crowns, implants, surgical guides and other intraoral devices are outside this catalog.

04 / PURPOSEFUL PRESENTATION

Give your expertise a form.

A cohesive display can connect your specialty, your message and the character of your space.

ILLUSTRATIVE CONCEPT / CUSTOM MADE TO ORDER

H01 Education collections

Assemble approved general anatomy models for staff education and guided conversations.

H02 Department displays

Choose a specialty theme and coordinate models, display bases and institution branding.

H03 Outreach & events

Commission tabletop models for presentations, open houses and community education events.

H04 Custom display hardware

Add model cradles, stands, label holders and other nonclinical presentation accessories.

Clinical educators approve anatomical references and teaching content. Display concepts are not diagnostic tools or treatment devices.

05 / FAMILIAR FORMS, THOUGHTFUL SPACES

Make a place feel personal.

Create welcoming, recognizable objects for common areas, activity programs and reception.

ILLUSTRATIVE CONCEPT / CUSTOM MADE TO ORDER

N01 Familiar-object collections

Choose buildings, vehicles or other familiar subjects for staff-led conversation activities.

N02 Tactile activity pieces

Explore large textured forms and coordinated trays for facility-reviewed activity use.

N03 Room identifiers

Customize nameplate holders, dimensional room numbers and decorative identity pieces.

N04 Reception collections

Coordinate display stands, information holders and models with the character of your facility.

Facility staff review size, loose parts, edges, handling and cleaning suitability. Activity pieces carry no claim to treat dementia or other conditions.

06 / YOUR INSTITUTION, IN MINIATURE

A place worth presenting.

Celebrate a building, a new wing or the institution behind the care.

FICTIONAL FACILITY MODEL / ILLUSTRATIVE CONCEPT

F01 Campus & building models

Miniatures from approved plans, drawings and reference photographs.

F02 Donor & milestone displays

Commemorative building pieces and presentation models for special occasions.

F03 Dimensional branding

Custom institution names, department signs and display lettering.

F04 Presentation collections

Coordinate a model, display base and inscription as one commissioned piece.

ONE PIECE OR A COMPLETE FAMILY

Designed to belong together.

Start with a curated direction. We tailor the subjects, quantities, scale and presentation to your team.

01

The specialty practice

An organ or joint model, coordinated base and custom label holder.

For consultation-room displays and general educational presentations.

02

The dental educator

An enlarged tooth, generic dental arches and coordinated model stands.

For dental practices, teaching rooms and outreach events.

03

The senior-living collection

Familiar-object models, large tactile forms and room-identity pieces.

For reception, staff-led activities and common spaces.

04

The institutional showcase

A facility miniature, dimensional branding and a commemorative display.

For lobbies, admissions presentations and milestone celebrations.

Collections are proposal starting points, not fixed packages. Final contents, design work, finish and pricing are confirmed in your quote.

TAILORED TO YOUR SPACE

Your scale. Your identity.

A consistent visual language turns individual pieces into a considered collection.

Scale & proportion

Desktop, handheld or enlarged display formats, subject to design and production review.

Anatomy & detail

Select the body region and authorized source model. Your professional reviewer approves the educational detail.

Color & contrast

Choose available white and blue tones or another palette suited to your institution.

Brand & labels

Add names, department titles, logos, model identifiers and approved educational labels.

Bases & assemblies

Request stable bases, display cradles or separable sections where the design allows.

Material & finish

Confirm appearance, layer texture, handling and cleaning requirements before production.

THE FINISH IS PART OF THE BRIEF

Printed objects may show layer lines and support marks. Color, surface quality, assembly and any finishing are agreed in advance; a sample can be quoted for approval.

LOCAL PRODUCTION. A PERSONAL PROCESS.

Tell us what you imagine.

Bring one idea or an entire collection. We will review the design, confirm the scope and prepare a custom quote.

01 **Share the purpose**

Tell us your facility type, audience, intended use and display location.

02 **Send the reference**

Provide an authorized 3D file, drawing, PDF or photographs, plus dimensions.

03 **Define the collection**

Include quantity, subjects, colors, branding and the delivery ZIP code.

04 **Approve the plan**

Confirm design work, professional review, material, finish, price and timing.

NEED A DISPLAY OR SAMPLE QUICKLY?

Ask about priority production. Rush and same-day printing depend on the approved design, size, material and schedule. Completion and delivery dates are confirmed in your quote.

Custom pricing: modeling, materials, size, detail, quantity, finishing and delivery determine the quote. Any revisions and rush charges are agreed before production.

Catalog scope: general education, display and nonclinical objects. No diagnosis, treatment, sterile-use, implant or intraoral-device claims. Sensitive information requires an agreed secure transfer route.

CREATED FOR YOUR INSTITUTION

You imagine it. We print it.

Anatomical models. Dental displays.
Thoughtful collections for the places that care.
